Nutritional / Pain Relief Shots

AcuPoint Injection Therapy is the injection of nutritional and pain-relieving substances (vitamins, plant/mineral dilutions, anesthetics) using a hypodermic needle into acupuncture points to boost wellness and reduce pain. Acupuncture appointments not required for most injections. I use very thin needles and offer numbing cream.

Simply call/text 509-590-3708 or email chris@completeacu.com to arrange a date/time or inquire.
